ELECTRONIC SCORING VERIFICATION

Once scoring for the session is complete, all scores must match between the tablet and the paper scorecard before proceeding.

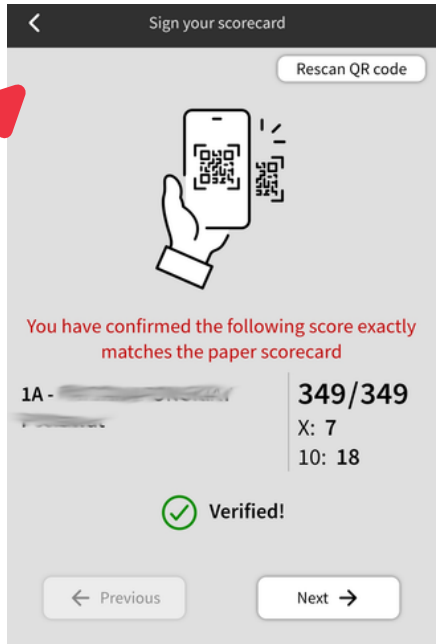

- **After completing electronic scoring, the tablet will display a verification screen, asking, 'Do you want to sign your scorecard and finish this round?' If you click yes, it will show you the following:**
  - Archer's name
  - Scores
    - Score total
    - Number of X's
    - Number of 10's (excluding X's)

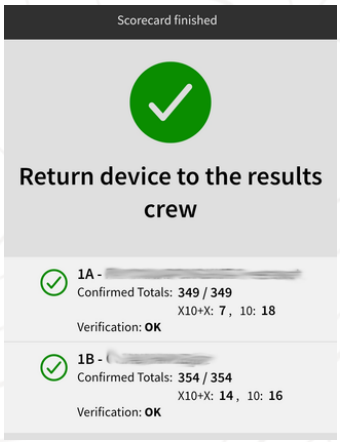

- **Do Check all the data are correct and matching between paper and tablet/electronic scoring**

- **Scan the accreditation QR Code on your accreditation card**
  - Tap on "Scan Confirmation Code".
  - Scan the QR code available on the archer's accreditation
  - Make sure to scan the QR code of the corresponding archer.
  - Once scanned, the scores will be confirmed.
  - Repeat the process for all the archers on the target to verify the scores. If any scores are incorrect, you can go back and fix the arrow value on the tablet.

- If an incorrect QR code is scanned, the tablet will display the following message: "The scanned code is not the correct one for this archer. Are you sure you scanned the code for "Archer name"? Please scan the correct code."
- The correct QR code must then be scanned to proceed.
- Repeat for all the archers

Once the QR codes of all archers on the target have been successfully scanned and verified, the tablet will display the message:
"Return device to the results crew / Verification OK."
The tablet and paper scorecards may now be handed to the scoring volounteers.

Electronic Score Verification

Step-by-Step Procedure

Step-by-Step Procedure

1. Record Scores

On paper and on the tablet.

2. Confirm on the Tablet

Accept the verification message.

3. Comparar Results

They must match exactly.
