

Scoringsystem details

For electronic scoring you will use your private phone. You have to install Ianseo ScoreKeeper NG App (available for Android und iPhone) and your phone should be well charged. Only a small amount of data will be transferred.

Ianseo ScoreKeeper App NG

Android

Manual (German)

iPhone

User manuals for the App in different languages are available on the Ianseo website <https://www.ianseo.net/> under *Software and Manuels*.

One person in the group will score on the paper scorecard, another person will score with the App. When you scan the QR-Code from the scorecard with the App, the App will connect to the scoring system.

Do not scratch the QR-Code!

The arrow values during the competition are 11/10/8/5 for the 1st arrow, 4/3/2/1/M for the 2nd arrow.

Enter the arrow value onto the scorecard and write the total sum in the column Ges. The total sum should be checked with the total sum in the App after every end to avoid mistakes immediately.

The 1st line on the scorecard is the target where the group starts. You start scoring in this line.

In the App you can also see the arrow values 9, 7 und 6. Please don't use these values. We will check all arrow values and such values will be changed to the next lower value.

The total sum must be entered in the line Gesamt. This value will be used for checking the score.

| 6 | | | | | 16 | | | | |
| | | | | | Gesamt | | | | |

All scorecards must be signed by the athlete and the scorer.

What happens when the phone breaks down (low battery)?

Another person in the group can start the App and scan the QR-Code from the scorecard. The App will receive all arrow values from the server and you can continue on another phone.

What happens when the App loses connection?

In this case the App will store all arrow values on the phone and will send them after reconnection.
